

Antimicrobial susceptibility testing with EUCAST criteria and methods - kokkuvõte

ESCMID PGC Tallinn

27.09.-30.09.2022

ELMÜ üldkoosolek Jõhvis 08.12.2022

Ajalugu, plaanid ja tegelikkus

- EUCAST pöördus Eesti NAC (ELMÜ mikrobioloogia sektsioon) poole ettepanekuga viia läbi Eestis täienduskursust 2019.aastal
- COVID korrigeerib plaane ja kavatsusi
- Üritasime organiseerida kursust 2020, 2021 ja lõpuks 2022 see õnnestub
- ESCMID toetus: 12 granti, 10 lektorit
- ECDC toetus: 1 lektor
- ELMÜ toetas kursust 5 stipendiumiga (5x500 EUR), mille taotlesid ja said Pärnu, IVKH, Rakvere ja ITK
- Eestist on 4 lektorit
- Bochum, Madrid kursused on eelnevalt korraldatud ESCMID-I poolt
- Eesti läks EUCAST-iile üle 2010.a., seega meil on 12 aastat praktistikat kogemust

Kursuse eesmärk ja ülesehitus

- Selgitada kriteeriumid ja meetodid, mida kasutatakse antibiootikumide murdepunktide (*breakpoints*) välja töötamiseks ning tutvustada meetodeid nende juurutamiseks ja kontrollimiseks mikrobioloogia laborites
- Kursuse teoreetiline osa oli toetatud EUCAST, ECDC, EPASG ja ESGARS poolt
- Kursuse praktiline osa oli viidud läbi kolmes erinevas mikrobioloogia laboris, kusjuures igas laboris on demonstreeritud spetsiifilisi meetodeid ja kursantidel oli võimalik külastada kaks laborit oma valikul. Laborite valik oli representatiivne: regionaalne, kesklabor, eralabor

Labori sessioonile registratsioonilehe näidis

EAST-Tallinn Central Hospital microbiology lab

East-Tallinn Central Hospital laboratory is mainly serving municipal hospital and also family doctors and medical specialists.

Demonstrated methods:

1. Disk diffusion RAST method
2. Phenotypical methods for resistance mechanisms detection
3. Broth microdilution test for MDR
4. VITEK automated AST
5. Amplex LAMP technology for resistance genes detection
6. MALDI-Tof ESBL enzymatic assay
7. Colorimetrical tests for ESBL and carbapenemase detection
8. Microfluidic automated method for direct MIC detection from positive blood culture

MAXIMAL number of participants is 14

Kursuse eesmärk ja ülesehitus

Course Programme

Tuesday, 27 September 2022

14:30 – 15:00 Arrival, welcome coffee and registration

Marina Ivanova

Presentation of the course

Christian Giske, Gunnar Kahlmeter

15:00 – 15:30 EMA perspective: Requirements for approval of new antibacterials in the EU

Radu Bat Gros (Online)

15:30 – 16:00 The EUCAST system

Christian Giske

16:00 – 16:30 The EUCAST breakpoint tables – how to use them?

Gunnar Kahlmeter

16:30 – 17:00 Pharmacokinetics and -dynamics

Shampa Das

17:00 – 17:30 Integrating available information – how clinical breakpoints are set

John Turnidge

17:30 End of teaching

18:30 Welcome dinner in the city center

Wednesday, 28 September 2022

08:00 – 08:30 New definitions of S, I and R and the ATU

Gunnar Kahlmeter

08:30 – 09:30 Antimicrobial phenotypic susceptibility testing

Erika Matuschek

09:30 – 10:15 Quality control in the laboratory

Jenny Ahman

10:15 – 10:45 Coffee break

10:45 – 11:15 Intrinsic resistance, exceptional phenotypes, expert rules and the process of interpretive reading of antibiograms

Sören Gatermann

11:15 – 11:45 The role and use of Guidance documents, what to do when there are no breakpoints?

Robin Howe

11:45 – 12:15 Rapid AST from positive blood cultures

Emma Jonasson

12:15 – 12:30 Discussion

12:30 – 13:30 Lunch break

13:30 – 14:30 AST for anaerobes

Robin Howe

15:00 – 18:00 Laboratory sessions

Marika Jürma-Ellam, Anastasia Bilozor,

Maria Viiklepp, Kaspar Ratnik, Marina Ivanova

Manual and automated methods:

disk diffusion, RAST, microdilution, gradient tests, genotypic methods, MALDI-ToF detection of resistance
(20 participants per site maximum)

18:00 Sightseeing in the old Town with tasting local snacks on Town Hall Square

Thursday, 29 September 2022

09:00 – 09:45 Novel phenotypic methods for AST (besides molecular methods) and detection of resistance

Oskar Ekelund

09:45 – 10:30 WGS for AST and AMR detection

Maido Remm (Online)

10:30 – 11:00 Coffee break

11:00 – 11:30 AST of mycobacteria: news from the AMST subcommittee

Jim Werngren (Online)

11:30 – 12:00 Challenges in fungal AMR detection

Helle Järv

12:00 – 13:00 Lunch break

13:30 – 16:30 Laboratory sessions

Marika Jürma-Ellam, Anastasia Bilozor,

Maria Viiklepp, Kaspar Ratnik, Marina Ivanova

Manual and automated methods:

disk diffusion, RAST, microdilution, gradient tests, genotypic methods, MALDI-ToF detection of resistance
(20 participants per site maximum)

16:30 End of day

Friday, 30 September 2022

09:30 – 10:15 Susceptibility testing for AMR surveillance – problems and possibilities

Liselotte Diaz Höglberg (Online)

10:15 – 11:00 ESBL- and carbapenemase-producing Gram-negative bacilli: epidemiology in North-Eastern Europe

Anastasia Bilozor

11:00 – 12:00 Application of AMR data in treatment guidelines

Tim Eckmanns

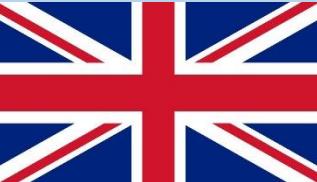

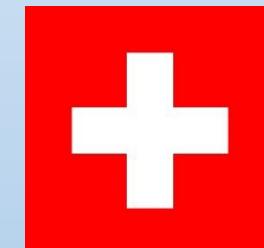

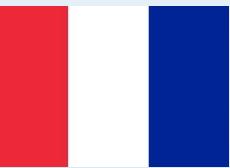

12:00 Closing remarks, farewell coffee and take away lunch

Thank you!

Göranur@kronoberg.se

Osalejate ja lektorite geograafia

45 osalejat 20 riigist

Eesti kursuse korraldajad

- Anastasia Bilozor – kursuse administraator
- Paul Naaber – teadusprogramm
- Marina Ivanova – kursuse koordinaator
- Marika Jürna-Ellam – PERH labor
- Maria Viiklepp, Kaspar Ratnik, Paul Naaber - Synlab
- Marina and Anastasia – ITK labor

ESTONIA, Tallinn

Population of just over 1.3 million

Total area of 45,339 square kilometres

The capital city Tallinn

The barn swallow
is the national bird of
Estonia

The Estonian Song Festival is UNESCO's
Masterpiece of the Oral and Intangible
Heritage of Humanity

Tagasiside osalejatelt

- 29 N, 10 M vastasid (65%)
- Erialad:
 - Mikrobioloogid -20
 - Klintsist/mikrobioloog – 6
 - Klintsist – 2
 - Farmatseut – 1
 - Muu (loomaarst, PK/PD spetsialist, laboriarst, laborimeditsiini resident, epidemioloog)
- Vanuse grupid:
 - Alla 35a. – 16
 - 36-45a. – 9
 - Üle 45a. – 14

Tagasiside osalejatelt - ettepanekud

- I expected little more from the interactive sessions, e.g. some insight on the laboratories workflow
- Would've liked to do some practical work
- Online lectures are harder to focus on but that can't be helped and may be a personal preference
- Screens for presentations were quite small
- That I could not visit all 3 laboratories, only 2

Tagasiside osalejatelt – positiivsed momendid

- That there were not too many participants so you really got the opportunity to talk to both the students and the presenters/course leaders
- I loved the atmosphere there and the cooperation of the lecturers and how much they love to share their knowledge and experiences
- Practical information, laboratory visits, informal atmosphere, warm welcome, quality and expertise of speakers
- A lot of different information and subjects
- The EUCAST parts and visiting the labs
- Organization committee was very nice
- Very well organized

ESCMID PGC in Tallinn 2022
